Sliding Doors

Introduction

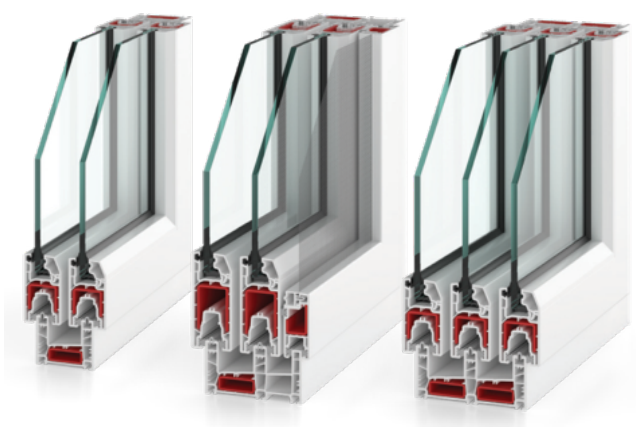

Winsplast uPVC Windows are all weather resistant, they require very little maintenance and are very easy to clean and they last longer.

Today it is experienced and observed that uPVC is the best material to have such smooth and elegant forms and functions in modern windows & doors designs. In wood it is difficult and aluminum doesn't match it. Not all the uPVC windows are the same, the design of uPVC Profile make a lot of difference. The Windows made of Winsplast Profiles making a V Groove between Sash and bead distinguishes from it all other windows available in the market. Winsplast Windows are state of the art.

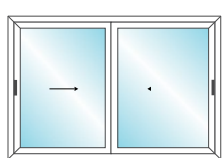

Sliding Doors & Windows

Sliding Doors & Windows comprise of two or more sashes that slide horizontally on the outer frame. When compared to aluminum and other traditional sliding windows, the sashes of Doors & Windows move smoothly on inbuilt uPVC track of the outer frame. Sliding Doors & Windows are incredibly functional and one of the easiest type of Doors & Windows to use. Winsplast Doors & Windows are steel reinforced for added strength. Multipoint locking ensures better safety and security. These windows allow more light and air to come in.

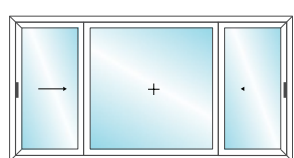

- Laterally offset water slot for better vapour pressure
- Screw support webs
- Sloped drainage flow for fast water extraction
- Flat bottom surface for easy mount on brick/concrete.
- Aluminium track for better rolling performance
- Stiffening web for high wind load support

Casement Doors & Windows

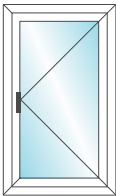

The most popular style of Doors & Windows used in India is outward open able. Winsplast Doors & Windows open outward almost 90° to provide maximum air and sunlight to come in. Our Windows ensure complete sealing from dust, noise and other pollutants when closed. Casement Windows can be made inward opening also. Multi-chambered profile and double sealing with EPDM gasket reduces the transfer of the heat and when windows & doors are fitted with double insulated glass, it makes them more energy efficient and save more energy upto 30%.

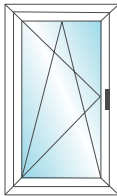

- Slope angle for very easy water flow and dirt reduction
- Huge water groove for strong monsoon conditions
- Extra inner webs for stronger profile
- Extra deep chamber for better vapour pressure and drainage

- Flat bottom surface for easy mounting on brick concrete...
- Striker plates and friction hinge mounted in steel for extra strength (burglarproof)
- Water stopper and friction hinge support
- Universal Euro-groove
- Steel reinforcements heavy duty for Indian wind loads
